**A word from your Golf Course  
Superintendent: Win Thomas**  
[winthomas@cypresslakesgolfclub.net](mailto:winthomas@cypresslakesgolfclub.net)

We will be aerating putting greens beginning Monday June 4th. The operation will take two days to complete. Restrictions will be placed on use of holes being aerified. Please check the tee sheet at the front desk in the pro shop. We will aerate front nine greens Monday and back nine greens Tuesday.

Fairway definition is created when a difference is noticed in the mowing height of the rough and fairway. The recent warm temperatures, rain and application of fertilizer will accelerate plant shoot growth creating the definition we all desire. A plant growth regulator will be applied to the fairways later this month to help reduce the clumping always present during the summer months.

Feel free to stop by the office or call me at (850) 937-3887 if you have any comments or suggestions.

### **Turf Tip of the Month**

It is time to control for mole crickets (same product will help control fire ants as well). Some areas have reported egg hatch and control measures are most effective when the crickets are in the nymph stage. Please contact your local county extension agent for product recommendations, rates, and timing of application. In Escambia County call 475-5230 and in Santa Rosa County call 623-3868.

### Pro Tip of the Month

Keep your spine angle the same throughout your back swing and down swing until impact. To see if your spine has moved, take a backswing and stop it at the top. Your spine angle should not have changed positions. Another way to see is to swing with your shadow in front of you. If your head moves before the impact position, your spine is moving. Spine angle movement is one of the major causes of miss hit shots.
