## **A word from your Golf Course Superintendent: Win Thomas** [winthomas@cypresslakesgolfclub.net](mailto:winthomas@cypresslakesgolfclub.net)

We will begin overseeding playing surfaces this month. We will begin with tees and collars the week of October 8<sup>th</sup>. We will overseed greens at end of the month (after the Club Championship). Once again, we will seed the tees and collars with perennial ryegrass (*lolium perenne*) and the greens with rough bluegrass (*poa trivialis*). This will require multiple light irrigations (approx 4 mins in duration) to the greens and tees throughout the day. The practice putting green will be closed after seed is applied to allow the seed to germinate and begin rooting.

If you have comments or suggestions, feel free to stop by the office or call me at (850) 937-3887. My doors are always open and I look forward to hearing from you soon.

### **Turf Tip of the Month**

If you plan to overseed your lawn, now is the time. Be sure to keep the seed moist until it germinates. This will require multiple light irrigations throughout the day. Apply just enough water to moisten the seed. Once the seed has germinated, water deep and infrequent to promote strong roots. An application of fertilizer high in Phosphorous (such as 9-2-24 or 5-10-31) will aid in germination and early rooting. Cool season turfgrass requires a half inch of water per week. Too much water will increase disease pressure and severely affect spring transition. If you do not overseed, this is a great time to apply a pre-emergent fertilizer (such as Pre-emergent 5-10-20).

### **Pro Tip of the Month**

How is your balance?

Do you slide your hips?

A great drill to determine if you sway, slide, or dip your head is:

#### **THE SHADOW DRILL**

This only works on a sunny day where you can see your shadow. Get the sun at your back so that your shadow is directly in front of you. Take a slow practice swing all the way back, and back to the impact position. If you can do this without moving your shadow, you are doing better than most.

After impact, the shadow does move towards your target.

The closer you get to not moving your shadow, the more consistent your shots will be.

**Try these tips and I promise they will help your game.**
