**A word from your Golf Course  
Superintendent: Win Thomas**

[winthomas@cypresslakesgolfclub.net](mailto:winthomas@cypresslakesgolfclub.net)

September will be another busy month as we ready the course for the club championship. Also this month, we will apply pre-emergent herbicide to suppress winter weeds.

This has been a difficult growing season. The turfgrass has had to endure periods of drought and heavy rain, heavy traffic, and numerous pests (weeds being number one).

In October, we will apply cool season turfgrass as overseed to the greens and tees and put the bermudagrass to sleep for a much-needed rest.

A winter work schedule is being put together at this time. The list includes bunker improvements, drainage work, ornamental transplanting, irrigation repair, dead tree removal and brush clearing. Any comments or concerns you may have in this area would be greatly appreciated. Feel free to stop by or call the office at (850) 937-3887.

**Turf Tip of the Month**

Late season fertilizer should contain a high percentage of Potassium. There are three numbers on a fertilizer analysis. The first number is Nitrogen, second is Phosphorus, and the last number is Potassium. Potassium is important for root development, increases plant hardiness, and aids in spring green up.

### **Pro Tip of the Month**

Make sure when you set up that your club is at a 45 degree angle. Every club in your bag except your putter should be 45 degrees at address and at IMPACT. The key to perfect contact is to return the club back to where it started. Easier said than done but at least start out in the correct position.

**Try these tips and I promise they will help your game.**
