Tee it Forward!!!

Give it a try. You will have more fun.

A word from your Golf Course

Superintendent: Win Thomas

winthomas@cypresslakesgolfclub.net

We will begin overseeding tees and greens the week of 5 October. Once again, we will seed the tees and collars with perennial ryegrass (*lolium perenne*) and the greens with rough bluegrass (*poa trivialis*). This will require multiple light irrigations (approx 4 mins in duration) to the greens and tees throughout the day. The practice putting green will be closed after seed is applied to allow the seed to germinate and begin rooting.

If you have comments or suggestions, feel free to stop by the office or call me at (850) 937-3887. My doors are always open and I look forward to hearing from you soon.

Win

Turf Tip of the Month

If you plan to overseed your lawn, now is the time. Be sure to keep the seed moist until it germinates. This will require multiple light irrigations throughout the day. Apply just enough water to moisten the seed. Once the seed has germinated, water deep and infrequent to promote strong roots. An application of fertilizer high in Phosphorous (such as 9-2-24 or 5-10-31) will aid in germination and early rooting. Cool season turfgrass requires a half inch of water per week. Too much water will increase disease pressure and severely affect spring transition. If you do not overseed, this is a great time to apply a pre-emergent fertilizer (such as Pre-emergent 5-10-20).

Pro Tip of the Month

Keep your right hand connected during transition

Nearly eight out of ten people I teach have a problem with keeping their right hand connected with their left (opposite for lefties) during the transition of their back swing and down swing. This problem will cause many of your miss hits like "pulling the ball", "snap pull hooks" & "topping the ball". One way to check to see if you have this problem is to take a back swing and stop it at the top. Then look at the palm of your right hand and see if it is still touching your left thumb. If there is any separation at all, you would be one of the eight I mentioned above. This is one of the most important pressure points of the grip. Keep pressure on your left thumb with your right palm during the transition to correct the problem. If you correct this problem, straighter and more solid shots will follow.

**Try these tips and I promise
They will help your game.
Good Luck! John**
